

PRODUCTIVITY TRACKER

Abstract

Background:

The Productivity Tracker is a timer-based application developed to help users effectively monitor and manage the time spent on various daily tasks. It focuses on improving time utilization and productivity.

Objective:

The main objective of this project is to promote efficient time management and encourage productive work habits. It aligns with United Nations Sustainable Development Goal 8 (Decent Work and Economic Growth).

Methodology:

The application allows users to create tasks, start and stop timers, and automatically record the time spent on each activity. It supports multiple task tracking, stores task history, and generates daily reports to analyze time usage.

Key Features:

The system includes task timing, multi-task tracking, report generation, data storage, and a simple user-friendly interface for ease of use.

Applications:

This tool is useful for students, professionals, and individuals to improve study planning, work efficiency, time management, and personal development.

Conclusion:

The Productivity Tracker helps users understand their time usage patterns and make better decisions to enhance productivity. By analyzing daily reports, users can reduce time wastage and build disciplined, productive habits.
